Dear Wholesaler

Thank you for assisting us with managing the Curam Duo (Sandoz)/Augmentin Tablet stock in New Zealand. We have finally sold through all of the Curam Duo and therefore **Augmentin Tablets are now released for sale.**

As we have not kept any previous orders for Augmentin on backorder. ***Please send us a new order for Augmentin Tablets.***

We recommend that you continue to sell through your stock of Curam Duo before releasing Augmentin tablets, as Curam Duo have a shorter expiry than GSK's Augmentin.

We will be sending a fax out to all pharmacies **next week** to let them know that we are back in stock of Augmentin Tablets, but that they should support you by purchasing and dispensing Curam Duo stock first.

If you have any question, please let me know.

Once again, many thanks for your support.

Regards

Quincy
