CLASSIFICATION CHANGE

GEES LINCTUS NOW A SCHEDULE 1 PRESCRIPTION MEDICINE

Dear Healthcare Professional

PSM Healthcare Limited, trading as API Consumer Brands, wishes to advise that as of 25 February 2019, Gees Linctus is now classified as a schedule 1 prescription medicine.

Gees Linctus has been a trusted cough mixture for generations, used to provide relief from a wet, productive and irritating cough. The anhydrous morphine reduces the desire to cough, and squill helps to remove phlegm.

This is a courtesy notification to ensure you are aware of the recent change in classification.

Gees Linctus can be dispensed in any volume, however it is available in a 200ml pack size for dispensing convenience.

GEES LINCTUS

Key Indications:

Provides relief from:

Wet, productive coughs
Irritating coughs

Ingredients

Squill Oxymell 1.67% w/v - expectorant
Anhydrous morphine 0.0165% w/v (Opium Tincture 1%) – cough suppressant

Dosage

Adults & children over 12 years:

Take 5 mL sipped slowly or added to 10 mL of warm water and sipped slowly.
To be taken up to 3 to 4 times daily as required.

Please do not hesitate to contact us on regulatory.affairs@api.net.nz if you require further product or technical information.
